

Overview

Recognising a gap in the market for safe and reliable roller shutters, Chung Tai was established in 1979. For over 25 years, Chung Tai has continued to be an outstanding designer and manufacturer in the Shutters and Doors industry.

We understand that different customers have different needs, that's why we design, manufacture and install a wide range of tailor-made products, including metal roller shutters & grilles, polycarbonate transparent roller shutters, fire-rated roller shutters, doors and louvers.

Innovation has always been a key factor to Chung Tai's success. In 1995, we became one of the first Hong Kong vendors to have had a fire-rated roller shutter successfully tested in accordance with BS 476: Part 22. Our in-house research team did not stop there and other unique and ground-breaking roller shutters, doors and louvers have since been developed and are well received by our customers.

Chung Tai's commitment to Hong Kong means that we still produce products that are "100% Made in Hong Kong". Our ISO 9001-certified factory and workshop in Tuen Mun produce over HK\$ 20 millions' worth of goods and services annually for local and global businesses.

Milestones

1979 "Chung Tai Construction Company" is formed. Its main focus is to supply and install locally made roller shutters.

1987 Chung Tai is included in the approved list of suppliers of materials and specialist contractors regarding roller shutters for public works by the Government Secretariat Lands and Works.

1995 Submits a Vertically Sliding Roller Shutter in a fire test, satisfying the requirements of BS476: Part 22: Clause 8, 1987 and ISO 3008, 1994 for 242 minutes at Warrington Fire Research, Cheshire, UK.

1998 Chung Tai becomes a ISO 9001: 1994 certified company and recognised as such by the HKQAA.
